

**RESULT: MEDIUM RISK**  
**(M-CHAT-R-SCORE:3-6)**

Your child's M-CHAT-R-F™ score indicates a medium risk for Autism Spectrum Disorder. A follow-up or second stage of screening is required (second stage of M-CHAT-R/F) to get additional information about at-risk responses.

Based on the result of your child's M-CHAT-R-F score, we recommend that you seek further diagnostic evaluation and eligibility evaluation for early intervention.

**Your child's intervention starts here.**
